

ACKNOWLEDGEMENTS

It is important to mention that I would have not succeeded on my own without the support and guidance of a number of people. Indeed, the work of this nature cannot be achieved by one person without the assistance of others. My acknowledgements go to the following people:

- My supervisor, Mr M.C Mphahlele, whose patience, dedication and encouragements gave me hope and confidence. You were always serious and determined to see me go through this ‘**academic bridge**’ “May the Almighty God bless you”.
- My gratitude is also extended to Professor S .Louw for her expert guidance, inspiration and insistence.
- My mother, úwatshiremba Muthelo Makhuvha for her painstaking dedication and love that made me what I am today.
- The support of my family and co-students Mrs Nkhumeleni and Mr Mañena for their motivational inspiration during my studies.
- Above all living beings, I thank the Almighty God who gave me life and strength to carry on with this research up to the end. It was the words: “Nothing is impossible with God” that kept me going up to the end of this research.
