NODULATION, DRY MATTER ACCUMULATION AND GRAIN YIELD OF COWPEA AND LABLAB VARIETIES UNDER SOLE AND INTERCROPPING SYSTEM WITH MAIZE

A DISSERTATION
SUBMITTED TO THE SCHOOL OF AGRICULTURE AND ENVIRONMENTAL SCIENCES, DEPARTMENT OF PLANT PRODUCTION IN THE FACULTY OF SCIENCES, HEALTH AND AGRICULTURE, UNIVERSITY OF THE LIMPOPO, TURFLOOP, SOUTH AFRICA.

BY

SIBONGILE GIFT MISHIYI
[B.AGRIC ED, B. AGRIC ADMIN HONS]

IN PARTIAL FULFILMENT OF THE REQUIREMENTS FOR THE DEGREE OF MASTERS IN AGRICULTURAL MANAGEMENT

OCTOBER 2006

SUPERVISOR:

PROF. KINGSLEY K AYISI
DECLARATION

I declare that the dissertation hereby submitted to the University of the North for the degree of Masters in Agricultural Management has not previously been submitted by me for a degree at this or any other university, that it is my own work in design and in execution and that all material contained therein has been duly acknowledged.

PROF K.K. AYISI
ACKNOWLEDGEMENTS

First and foremost, I would like to thank God Almighty for giving me the wisdom to pursue my studies, and for guiding me through life’s decisions.

My sincere gratitude goes to my supervisor Prof K K Ayisi, for his endless guidance, patience and understanding. Thank you for sharing your knowledge with me.

To my parents, thank you for taking so much effort and making so many sacrifices to give me an opportunity to study. I owe you a dept of gratitude I can never repay.

A special word of thanks to the Maswanganyi family for their support during my study, in particular John Rhulani. Your contribution is immeasurable, thank you for being there and believing in me.

I would also like to acknowledge NRF for funding this research and Gauteng Department of Agriculture Conservation and Environment for their financial contribution towards the completion of this paper.
DEDICATION

This study is dedicated to my family that is my parents: Mr T H Mishiyi and Mrs G T Mishiyi; my siblings Makumeke, Dumi, Wisani, Mixo and Risenga. I would like to thank each one of you for the support you have given me. Most of all, this paper is dedicated to my daughters Khani and Masana; your existence makes me want to strive for more.
# TABLE OF CONTENTS

Dissertation abstract  
1

**CHAPTER 1**  
General introduction and literature review  
3-11

**CHAPTER 2**  
Grain yield and yield component response of maize and legume varieties in intercrop systems.  
12

Abstract  
13

Introduction  
14-17

Materials and Methods  
18-21

Results and discussion  
22

Maize grain yield  
22-23

Cowpea grain yield  
23-24

Harvest index (maize)  
25

Harvest index (cowpea)  
25-26

Maize yield components  
27-28

Cowpea yield components  
28-29

Tasselling (Maize)  
29-30

Flowering (Cowpea)  
30

Physiological maturity (maize)  
31

Physiological maturity (cowpea)  
31

pLER (maize)  
32

pLER (cowpea)  
32

Plant height (maize)  
33

Conclusions  
34

35-47
CHAPTER 3

NODULATION, DRY MATTER ACCUMULATION, ECOLOGICAL INTERACTION AND SYMBIOTIC ACTIVITY OF COWPEA AND LABLAB UNDER SOLE AND INTERCROPPING SYSTEM WITH MAIZE

Abstract 48
Introduction 50-54
Materials and methods 55-56
Results and discussion 57
  Maize dry matter accumulation 57
  Shoot dry weight 57-58
  Root dry weight 58-59
  Total dry weight 59-61
  Nodule mass 61-63
  Nodule number 63-64
  Nodule effectiveness 64-65
  Trend in nodule production 65
  Chlorophyll content 66
  Stover yield 66
  Ecological interactions of component crops 67
  Protein concentration (maize seed) 68
  Protein yield (maize) 68
  Protein concentration (cowpea seed) 68-69
  Protein yield (cowpea) 69-70
  Nitrogen yield 70
Conclusions 71
Table and figures 72-91

2.12 Partial land equivalent ratio (pLER) of cowpea varieties intercropped with maize at Syferkuil and Dalmada.

2.13 Plant height of maize intercropped (M+) with different cowpea and lablab varieties at Syferkuil and Dalmada

3.1 Dry matter accumulation of maize intercropped (M+) with different cowpea and lablab varieties at Syferkuil.

3.2 Dry matter accumulation of maize intercropped (M+) with different cowpea and lablab varieties at Dalmada.

3.3 Dry matter accumulation of cowpea and lablab varieties (sole and intercrop) at Syferkuil.

3.4 Dry matter accumulation of cowpea and lablab varieties (sole and intercrop) at Dalmada.

3.5 Nodule weight, nodule number and nodule colour of cowpea and lablab varieties at Syferkuil.

3.6 Nodule weight, nodule number and nodule colour of cowpea and lablab varieties at Dalmada.

3.7 Effective nodule colour of cowpea and lablab varieties at Syferkuil and Dalmada

3.8 Chlorophyll content of maize intercropped (M+) with different cowpea and lablab at Syferkuil and Dalmada.

3.9 Stover yield of maize intercropped with (M+) different cowpea and lablab varieties at Syferkuil and Dalmada.

3.10 Protein concentration and protein yield of sole and maize intercropped (M+) with
cowpea and lablab at Syferkuil and Dalmada.

3.11 Grain protein concentration and Protein yield of sole maize and maize intercropped (M+) with cowpea and lablab varieties at Syferkuil and Dalmada.

3.12 Correlation between above-ground nitrogen concentration and chlorophyll content of maize intercropped with (M +) different cowpea and lablab varieties at Syferkuil and Dalmada.
